

FINC 462/662 -- Fixed Income Securities

FINC-462/662: Fixed Income Securities

Introduction to Fixed Income Markets

Spring 2022

Prof. Matt Fleckenstein

University of Delaware, Lerner College of Business and Economics

Overview

Our goals for today

- ☐ Get a sense of what "Fixed Income" means.
- ☐ Learn about different segments of the Fixed Income markets.
- ☐ Get to know different types of Fixed Income securities

Table of Contents

- Overview
- Introduction
- Sectors of the Fixed Income Market
- Size of the Fixed Income Market
- Treasury Securities
- Agency Securities
- Municipal Securities
- Corporate Bonds
- Asset Backed Securities
- Derivatives of Fixed Income Securities
- Short-Term Funding Markets
- Wrap-Up
- Reading

Introduction

What is a Fixed Income Security?

- **NASDAQ's definition:** "Investments that have specific and fixed interest rates or dividend rates, such as bonds."
- **Fabozzi's definition of a bond:** "A bond is a debt instrument requiring the issuer (also called the debtor or borrower) to repay to the lender/investor the amount borrowed plus interest over a specified period of time."
- For now, let's just think of a fixed income security as a loan with a standardized structure.
- We will also consider derivatives on fixed income securities.

Fixed Income Security Example

- On August 5, 2020, the US Government announced the auction of a 30-year coupon bond.
 - The face value issued was 26bn.
 - Every six months, starting on February 15, 2021, the US Government would pay interest. (coupons)
 - The US Government agreed to pay the face value back on August 15, 2050. (maturity)
- **Auction announcement**
- **Auction results**

Types of Fixed Income Securities

- The US Government bond discussed on the last slide gives us a framework for how to think about fixed income securities, but this example is just the tip of the iceberg.
- **Issuers:** Federal government, municipalities, corporations, foreign governments, government agencies
- **Coupons:** Fixed, Zero, Variable
- **Option-like features:** option to call, conversion, option to put
- **Collateral**

Sectors of the Fixed Income Market

We can classify the Fixed Income Market into *sectors* based on the **issuer** of fixed income securities.

- **U.S. Treasury Securities**
 - Securities issued by the U.S. government
- **Agency Securities**
 - Securities issued by federally related institutions and government-sponsored enterprises
- **Municipal Securities**
 - Securities issued by state and local governments
- **Corporate Bonds**
 - Securities issued in the U.S. by U.S. corporations and foreign corporations
- **Asset-backed Securities (ABS)**
 - Securities backed by a pool of assets
- **Mortgage-Backed Securities (MBS)**
 - Securities backed by mortgage loans

Treasury Securities

- Obligations of the US Government, used to finance government spending.
- US Treasury is the largest single issuer of debt in the world.
- Most active and hence the most liquid market in the world.
- Perceived to be among the safest in the world.
 - S&P cut the rating of US Government debt to AA+ in August 2011.
 - As of October 2021, still at AA+.

Credit Default Swaps on US Treasury Debt

- Credit Default Swaps will be covered in more detail later in this course.
- For now, think of the graph below as the price that investors are willing to pay to insure against a default of the US Government on its debt obligations.

Are U.S. Treasury Securities Riskfree?

- In this course, we will treat US Government debt as default-free.
- This, however, does not mean that Treasury securities are “risk-free.”
- We will study these risks in this course in detail and learn strategies to hedge such risk.

Types of Treasury securities

- Treasury Bills: maturity 1 year or less
- Treasury Notes: maturity from 1 to 10 years
- Treasury Bonds: maturity greater than 10 years, up to 30 years.
- Treasury Inflation Protected Securities (TIPS)
- Treasury Floating Rate Notes (FRNs)

Agency Securities

- Debt issues by US Agencies
 - Example: **Tennessee Valley Authority**
- Debt issues by Government-sponsored entities (GSEs)
 - Examples: **Fannie Mae**, **Freddie Mac**, **FHLB**
- Mortgage-backed securities issued by Fannie Mae, Freddie Mac, and **Ginnie Mae**
- GSEs have the dual purpose of earning profits for shareholders and also serving a public purpose (i.e. promoting home ownership).

Asset Backed Securities

- Mortgages
- Securitized mortgages
- Pools of loans (CLO and CDO)
- Credit Cards
- Student Loans

Example: Credit Card Asset Backed Securities

Derivatives of Fixed Income Securities

- Futures and Forwards
- Interest Rate Swaps
- Call options
- Caps and floors
- Swaptions
- Credit Default Swaps

Short-Term Funding Markets

- "Short-term" fixed income securities with maturities from overnight, to a few months.
- Commercial Paper
- Certificates of Deposit
- Money Market Funds
- Repurchase Agreements
- Monitored by the Federal Reserve Board in Washington, DC.
 - Short-Term Funding Markets
 - Money Market Analysis

Question 1

What is a Treasury Bill?

Hint

A Treasury Bill is a short-term fixed income security issued by the US Treasury with a term to maturity of less than one year. A Treasury Bill does not pay regular interest.

Question 2

What is the longest time-to-maturity of Treasury bonds in years?

20

Incorrect

Keep working on it!

Wrap-Up

Our goals for today

- ☒ Get a sense of what "Fixed Income" means.
- ☒ Learn about different segments of the Fixed Income markets.
- ☒ Get to know different types of Fixed Income securities
